

AQUA-TEKNIK A/S

INDUSTRY

- **Sandfiltration**
- **Active Coal**

Tanks of reinforced glassfiber or stainless steel for sandfiltration or filtration with active coal, ensures a long lifetime for the facility.

Individually labelled valves and flowdirections makes the facility operationally friendly.

- **Dosing Systems**

AQUA-TEKNIK has experience with the newest developments in dosing systems, and create individual operation-manuals for the users.

- **Chlorine/Electrolysis Systems**

Waterpurification with electrolysis is a water treatment principle, which is an environmentally friendly option.

Storage and handling of chlorine is avoided.

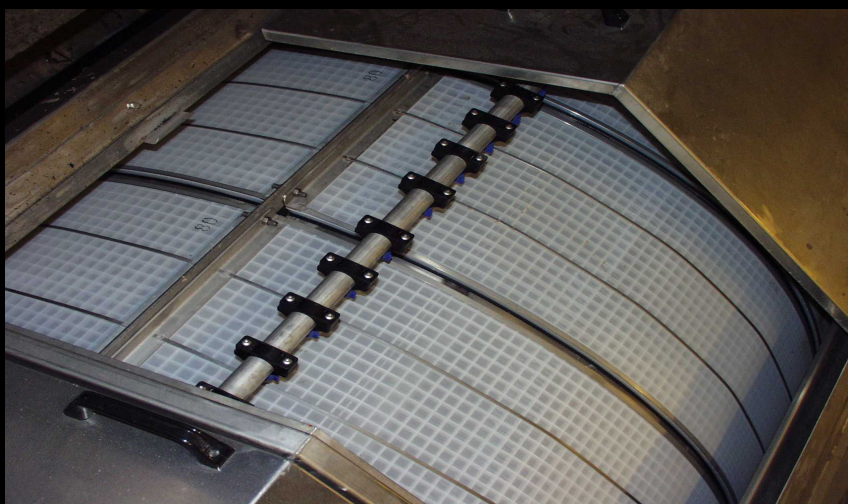

AQUA-TEKNIK A/S

INDUSTRY

- **Protein Skimming**
- **Ozone Systems**
- **Oxygen Generators**
- **UV Radiation**

The list of water treatment principles is too long to include here.

Use of the optimal method for the various purposes, or a combination of methods is a job for a specialist.

- **Drum Band Filtration**
- **Membrane Filtration**

Particles of all sizes can be removed.

From drumband filtration, to micro-, ultra-, and nanofiltration, and to reverse osmosis, RO.

It all depends on the purpose of the water.

- **Pre-fab. Units**
- **Turnkey Projects**

AQUA-TEKNIK delivers systems worldwide.

From the production plant in Denmark pre-fabricated units are being containerized.

Hereafter they are mounted on site, resulting in a turnkey project.
