

AQUA-TEKNIK A/S

WADI WALK

- **City of Arabia**
- **The heart of Dubailand**

In the heart of the visionary landscape of Dubailand, situated in the middle of the desert outside Dubai, the prestigious project City of Arabia is under construction and due for completion in 2009.

This development will provide accommodation for around 40.000 residents and includes the Mall of Arabia, considered to be the largest Mall in the world. It further includes the Restless Planet Dinosaur theme park, and the Wadi Walk - a 10 km long canal with Mediterranean style apartments, cafes and shops, together with 34 high rise towers of mixed commercial, hotel and residential use.

- **Arab Venice**
- **Mediterranean Lifestyle**

The Wadi Walk area will be created as an Arabian Venice, with the canal gently floating throughout the entire City of Arabia.

The Arabian "Abra" boats will serve as water taxis and link the residential areas with the shopping-, restaurant-, and theme park areas.

- **Water attractions**

Along the Wadi Walk, spectacular water attractions will appear.

The scene will change for every metre of the canal. New adventures are hiding behind every small island in the canal, and making a sailing trip a special event for both residents and visitors.

AQUA-TEKNIK A/S

WADI WALK

- **Spectacular waterfalls**
- **Water mirrors**

The waterway will run through the Mall of Arabia, and inside the Mall a huge waterfall will greet the visitors.

On top of the Mall of Arabia, "The hanging Gardens of Babylon" and water mirrors will be part of the scene.

- **Project launch**
- **Believe it or not, it is all coming together**

The words of the project director, the day the project was launched, becomes reality.

City of Arabia is the brainchild of Ilyas and Mustafa Galadari, whose visionary thoughts are made real by a team of professional consultants.

- **Raising in the desert**
- **A quiet day on site before the project launch.**

18.000 construction workers are planned to work on site, during the project period.

AQUA-TEKNIK A/S is proud to be chosen as a part of the entire team, at consultancy level, as well as at construction level.
