

# AQUA-TEKNIK A/S

## ZOO'S AND AQUARIUMS

- **Large-scale Aquariums**

The Danish Oceanarier in Hirtshals, with the aquarium of 4,500,000 litres of water is the largest in Europe.

AQUA-TEKNIK installed 23 large sandfilter units to create the optimal water treatment of the saltwater from The Northsea.

- **Crystal Clear Water**
- **Playgrounds for Seals**

The demand is clear water for display of the playing animals, combined with the right environment and water quality for the well being of the animals.

- **Koi Carps**
- **Shoal Fish**
- **Fish Breeding**

The correct and reliable water treatment is important, no matter if the scope is keeping expensive Koi Carps or fish breeding in general.

## ZOO'S AND AQUARIUMS

- **Manatees**
- **Sealions**

Some animals set special demands to their environment. The manatees are sensitive and loving creatures, that live of vegetables and plants.

- **Penguin World**
- **Polar Bears**

The light and the temperature makes the penguins feel at home on the South Pole.

To watch a penguin, playing in 5 degrees Celsius cold water, exercising against a stream of water, is an attraction magnet.

- **Water Environments**
- **Streams and Rocks**
- **Waterfalls**

The view and the sound of a waterfall or a small creek, will always be enjoyed by both animals and people.
