

AQUA-TEKNIK A/S

WATER TREATMENT

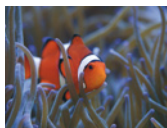

AALBORG ZOO

Polar bears in Aalborg Zoo shall have the best.
A perfect environment and optimal water quality was the main demand.

AQUA-TEKNIK A/S undertook the design and installation of the water treatment system for the Polar Bear area in the Zoo.

Another requirement was crystal clear water and thus optimal visibility through the water, since the basin has glass walls, enabling the visitors to see the polar bears playing.
