

AQUA-TEKNIK A/S

WATER TREATMENT

DANFOSS UNIVERSE

The famous Danish amusement park, with scientific features, involving water in all aspects.

Aqua-Teknik has designed and installed complete water treatment installation, with reverse osmosis facility and Elclozid electrolysis system.

Delivery of all pump arrangements for the amusement park, including the impressive powerful 18 meter geyser.

The project also included the water arrangement in connection with “The Blue Cube” art work, as well as the park irrigation.
