

AQUA-TEKNIK A/S

WATER TREATMENT

OCEANIUM

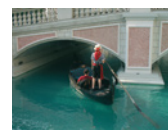

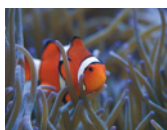

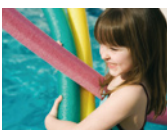

The Oceanium Park shall illustrate a travel through the South American continent, from the Tropics in the North to the cold South.

Aqua-Teknik was a partner all along the journey.

Saltwater - freshwater - warm water - cold water...
– the Oceanium has it all.

This facility is an example where Aqua-Teknik was involved at a very early stage, together with specialists in creation of rocks, which at the end has turned out a very realistic environment in the park.
