

AQUA-TEKNIK A/S

WATER TREATMENT

SOMMERLAND SYD

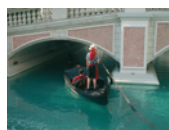

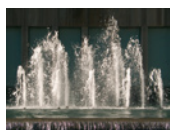

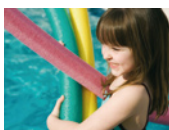

This wonderful amusement park is an example of an on-going project, where Aqua-Teknik is acting as contractor for water treatment, in connection with refurbishment and development of new activities.

Focus on automatic operation, and a minimum of maintenance are important parameters.

Whirlpool for 16 persons was part of Aqua-Teknik deliveries.

The latest development in Sommerland Syd is an impressive Wave basin, where Aqua-Teknik installed the complete water treatment system.
